

Introducing a Peer to Peer Program

TRANSFORMATION CONSULTANCY

PEER TO PEER PROGRAM IMPLEMENTATION

Peer reviews are consistently implemented throughout many world-wide educational institutions. It is important to note that a peer is at an equal level to the person being reviewed.

Benefits to the reviewer can include:

- As the reviewer you request the lecturer you would like to observe
- The reviewer experiences a different approach to teaching
- The reviewer observes how the students respond
- The reviewer completes a written record of the two most important benefits of being in the classroom.

The lecturer teaching gains from the positive feedback provided. Professional training organisations will ensure an active peer to program involves all faculty on an annual basis.

“ It is important to note that a peer is at an equal level to the person being reviewed”.

We offer the following:

- Educational support on the benefits of a peer to peer program
- Customised peer to peer program to meet your faculty needs
- Mentoring during the implementation process
- Optional quarterly monitoring reports.
